Marin Heđeš

Front-End & Mobile Developer

Slavonski Brod, Croatia | hedesmarin@gmail.com | 095 775 6683 | marinhedes.com
github.com/sincerelyfaust | linkedin.com/in/marinhedes

Summary

Front-end & mobile developer building production web and mobile apps with React (Next.js/Vite), Angular, and Flutter.

I focus on clean UI, performance, and maintainable architecture, and I'm comfortable owning features end-to-end —from implementation to release.

Experience

Freelance Software Developer, Self-employed Dec 2025 – present

Independent software developer specializing in modern web applications, frontend architecture, and end-to-end feature development. Working with clients on scalable, maintainable solutions, from user-facing interfaces to complex business workflows and third-party integrations.

- Selected Project — SerpDomains: Developed three interconnected React and TypeScript applications covering a domain marketplace, administrative backoffice, and domain landing platform.
- Integrated Stripe, PayPal, cryptocurrency, and wallet-based payments, implementing checkout workflows, payment verification, transaction handling, and error recovery.
- Built customer, seller, and administrative dashboards supporting domain management, bulk uploads, DNS verification, order processing, and domain transfers.
- Implemented affiliate systems, real-time customer support, content management, marketing tools, and operational analytics.
- Developed reusable UI components and scalable frontend architecture using TanStack Query, TanStack Router, Zustand, Tailwind CSS, and typed REST APIs.
- Built SEO-optimized domain landing pages with dynamic pricing, discounts, analytics, and marketplace integrations.

Seasonal Worker, Seasonal Employment July 2026 – Oct 2026

Lead Front-end & Mobile Developer, Beyondi d.o.o. Oct 2023 – Nov 2025

Led the development of production web and mobile applications using Angular and Flutter, overseeing architecture, engineering delivery, and application releases.

- Led frontend and mobile development, coordinating engineering tasks, reviewing code, establishing standards, and guiding architectural decisions.
- Contributed to project planning by breaking down epics into tasks, writing user stories and acceptance criteria, and supporting technical estimation.
- Developed and released cross-platform Flutter applications to the Apple App Store and Google Play Store.
- Integrated Apple Pay, Google Pay, Stripe, and cryptocurrency payments, including transaction handling and digital asset workflows.
- Developed Web3 wallet functionality including wallet creation, mnemonic recovery, token transfers, and secure wallet management.
- Implemented authentication and security workflows, biometric authentication, KYC verification, real-time communication, and push notifications.
- Built marketplace functionality supporting listings, buying and renting workflows, location-based services, and multilingual interfaces.
- Improved engineering workflows through technical documentation, Git conventions, linting standards, and monorepo architecture proposals.

Assistant worker in production, Vitafoam Croatia Mar 2021 – July 2023

Assisted production operations and supported manufacturing workflows.

Construction worker, Vertex Inženjering Sept 2019 – Oct 2019

Supported day-to-day on-site operations and assisted the team with assigned tasks.

Projects

dahliaOS (Open Source)

- Co-founded the open-source operating system project; helped get it included in the Open Invention Network (OIN).

SerpDomains

- Developed a domain marketplace, administrative backoffice, and standalone domain landing application using React, TypeScript, Vite, and TanStack.
- Implemented multi-provider checkout integrations, domain management workflows, administrative tools, and customer-facing features.

iVault

- Developed and released a cross-platform Flutter application for iOS and Android, combining marketplace, community, and Web3 functionality.
- Implemented native Apple Pay and Google Pay integrations, cryptocurrency wallet functionality, biometric authentication, real-time messaging, and push notifications.

Skills

Frontend: React (Next.js, Vite), Angular, TypeScript, JavaScript, HTML, CSS, TanStack Query, TanStack Router, TanStack Table, Zustand, Tailwind CSS, Radix UI, React Hook Form, Zod

Mobile: Flutter, Dart, GetX, GoRouter, iOS & Android Development

Payments & Integrations: Stripe, PayPal, Apple Pay, Google Pay, Cryptocurrency Payments, REST APIs, WebSockets, Firebase, Supabase

Web3 & Security: web3dart, Cryptocurrency Wallets, Authentication & Authorization, Biometric Authentication, Secure Storage, KYC

Tools & Practices: Git, CI/CD, GitHub Actions, pnpm Workspaces, Monorepos, i18n, Location-Based Services, Agile Development

Testing & Monitoring: Vitest, Playwright, Firebase Crashlytics, Instabug, Adjust SDK

Product & Design: Figma, Adobe Suite

Education

Industrijsko-obrtnička škola, Slavonski Brod, High School in Computer Numerically Controlled (CNC) Machinist Sept 2016 – June 2019

High school diploma program focused on CNC machining.

Certificates

Responsive Web Design (freeCodeCamp) Jan 2023

- Certificate

Languages

English: Native or Bilingual Proficiency

Croatian: Native or Bilingual Proficiency
